SAND ART

Sand Art, being a rare practice, very few artists have excelled in this art form. It is an art form that uses different colors of sand collected from various places. Three stages are involved in bringing out a magnificent piece of work. After the sand is collected, it is separated based on color, and then washed and dried. A sketch is made on cardboard with a pencil. The fine sand is then carefully and painstakingly pasted to make a beautiful picture. Because artificial colors are not used, the resulting pictures are more resistant to the erosive effects of time. In a world of artificialities, these lively pictures created from sand particles of different colors blessed by nature without the use of artificial colors are a real treat for the eyes.

Uday 2013

'Uday Rassalpuram' is an artist who creates miracles in Sant Art. Udayan paints lifelike realistic pictures using natural color shades, After seeing the picture, sometimes you will doubt whether it is a painting. We will make Sant pictures according to your budget.
